

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Rod Holders.....	160
Split Rings.....	104
Squids.....	144
Tournament Casting Weights.....	167
Watch Charms.....	45
Wire.....	166
Wire Pliers.....	166

## Please Read This Page.

Our salesmen go into every state in the Union and into Canada. We have Local Agents everywhere, so that it should be easy for you to buy our trade-marked tackle in your own city or town. We prefer the angler to order our goods through his local dealer, because it shows the dealer that there is a demand for "A. & I." tackle, and encourages him to place his stock order with us.

In almost every town there are a few anglers who want the best tackle that can be made—better than local dealers wish to carry in stock because of the limited demand. To such anglers this book should be especially interesting.

Our retail department is prepared to fill mail orders promptly and carefully. The prices in this Catalogue are absolutely NET. Every purchaser pays exactly the same price. We do not allow discounts—even to "our friends." Wholesale prices are given only to merchants who **carry fishing tackle in stock as a regular part of their business.**

When requested to do so, we will ship goods C. O. D. "with privilege to examine" provided enough cash is sent to cover express charges both ways.

We are glad to open accounts when satisfactory references are given. New York references are preferred.

### A Suggestion.

Make your orders plain. Use the order blank in the back of this book. Give the catalogue page and the number of the article and the price. Be brief. If you have a rubber stamp for your name, use it.

We will always correct mistakes promptly and cheerfully.

Make yourself so clear that if there **should be** a mistake it will be our fault.

Abbey & Imbrie's Hollow Point Snelled Hooks are sold only in these folders. Each hook may be taken out and put back without destroying the folder. We believe that the quality of "A & I" Snelled Hooks is far superior to those offered by anybody else at anything like the price.

For the various patterns of "A & I" Snelled Hooks see pages 5, 7, 9, 10, 11, 13 and 16.

Packed  $\frac{1}{2}$  dozen  
in wrapper.

## Highest Quality Snelled Hooks.

These Snelled Hooks are the best that can be made.

The hooks are "hollow point," hand made, tested and bronzed—of uniform quality and perfect temper.

The gut is "mist color." It is round, fresh and clear—without imperfections of any kind. It is always in proper proportion to the size of the hook.

The silk wrapping is wound by our best "snellers" and the ends are carefully secured; after which three coats of waterproofing are put on.

Our rust-proof Flexible Phosphor Bronze Cable is not only impervious to the action of the water, but also resists perfectly the teeth of powerful fish. We recommend it for such fish as Pike, Pickerel, Muscallonge, etc. It is infinitely superior to metal wound silk gimp.

Per dozen.....	1.50	1.25	1.00

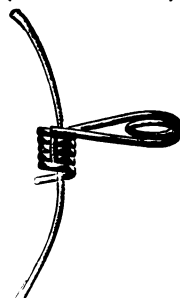

## German Silver Connecting Links.

A device for quickly changing hooks, leaders, spoons and other tackle. Saves tying and untying knots.

Nos.....	1	2	3
Per dozen.....	.18	.24	.30

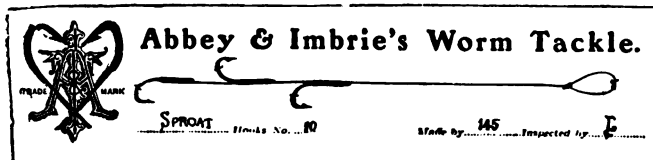

## Adjustable Hook Coupler. (German Silver.)

Indispensable where the angler wishes to use several hooks at various depths. Easily attached to the line in any place, as shown in illustration. No knots required. Useful for set lines.

One half dozen on a card.....Per dozen, .20

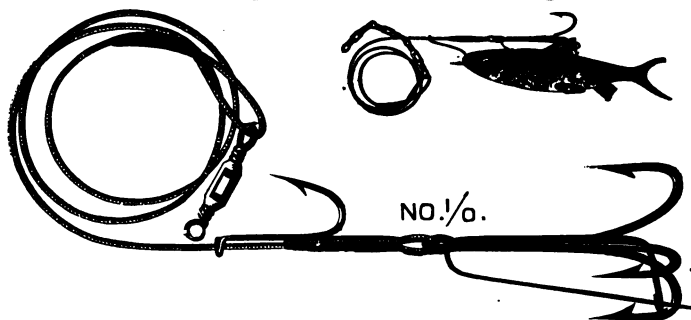

## Gangs.

For use when trout will not rise to a fly. Holds the worm "so that it looks like a worm." Hooks Nos. 2, 4, 6, 8, 10, 12 or 14. Each one on a card.

Single Gut..... each, 10 cents, or \$1.00 per dozen.  
Double Gut..... " 15 " " 1.50 " "

### The Original St. Lawrence Gang.

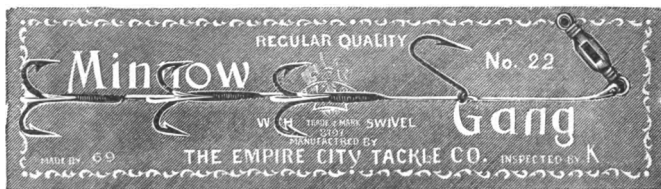

The only gang on which a bait can live, and which may be adjusted to any size minnow. Fitted with swivel, adjustable lip hook, patent treble hook and baiting needle. Mounted on rust-proof phosphor bronze cable—a radical improvement over metal wound silk gimp.

On treble hooks, Nos. 4/0 to 6 (see page 20) each \$ .20.

### "Empire City" Gangs.

On bright treble hooks and white gut, tied with silk. All have stationary lip hook. Each one on a card.

Each

Single Gut, Nos. 14, 16, 18, on Hooks Nos. 4, 6, 8..... .20

## Twisted, Spliced Knot.

No.		3	6	Feet long
800	Regular Bass.....	2.40	4.80	Per dozen

# Abbey & Imbrie's "Good Quality" Leaders.

Illustration shows improved method of carding leaders. Leaders may be removed without cutting or fraying.

Our "Good Quality" Leaders are made of carefully selected gut.

While they are not equal to our "Highest Quality" Leaders on page 31 they are better than most makers offer as "first quality."

The 6 ft. Leaders (without "droppers") are made by looping 3 feet leaders together. The sliding loops thus made afford convenient places for attaching dropper flies.

## Single Gut.

No.	Used with Flies on Hooks Nos.	3 ft.	6 ft.	
200 E. L.	Extra Light Trout (10 and 12)	\$1.50	3.00	Per dozen

# Highest Quality Leaders

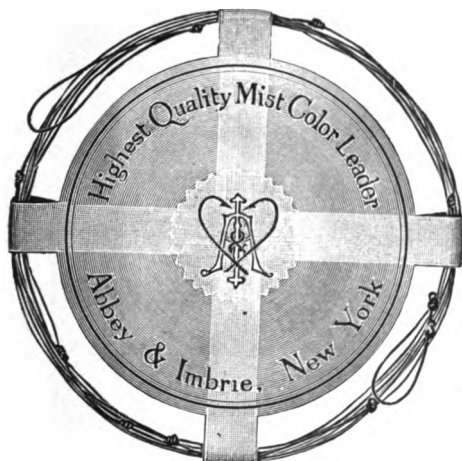

Illustration shows improved method of carding leaders. Leaders may be removed without cutting or fraying.

## Mist Color.

Our Highest Quality Leaders are made of fresh, round, clear gut, and represent in each weight the best leader it is possible to make.

The Six and Nine foot Leaders are made by looping 3 ft. leaders together.

The sliding loops thus made afford convenient places for attaching drop-per flies.

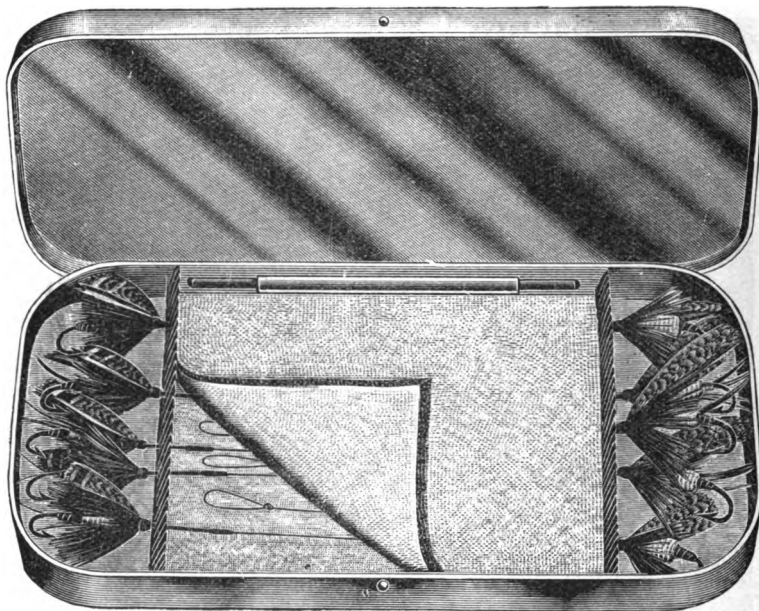

## Single Gut.

		Used with Flies on 3 ft. Hooks Nos.			
		3 ft.	6 ft.	9 ft.	
H. Q. Drawn Gut.....	(12 and 14)	\$2.50	5.00	7.50	Per dozen

21 (Vest Pocket Size)	1	2 doz.	\$ .75
24	1	4 "	2.00
28	2	8 "	2.50

## Reversed Wing Flies

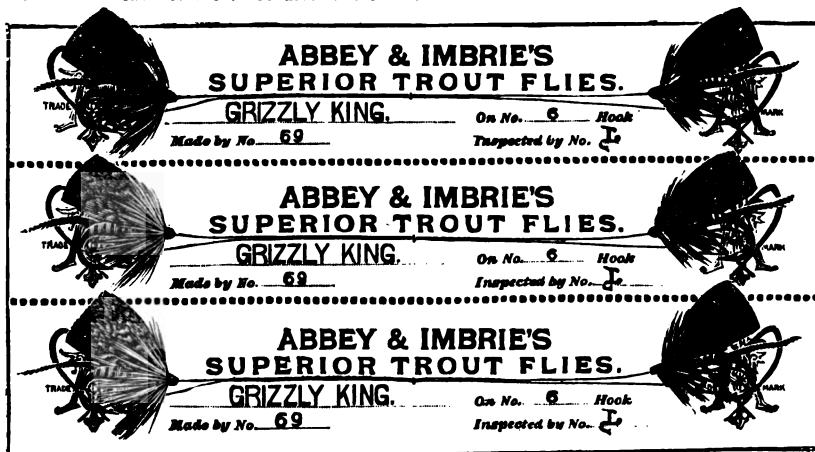

## Matched Wing Flies

The above illustrations of flies tied on Sproat Hooks Nos. 2, 4, 6, 8, 10, 12 and 14 are of exact size. The difference between a "Palmer" and a "Hackle" is shown, as well as the various methods of tying winged flies.

# Abbey & Imbrie's "Superior Quality" Trout Flies.

Our Superior Quality Trout Flies are the Original Carded Flies. They are on a superior quality of hooks and gut and have full silk bodies, carefully tied. The name "Superior" and the method of carding have been imitated. Be sure the flies you buy bear our full name and trade mark on each of the three divisions of the card.

Put up on perforated cards. We do not sell less than one-half dozen of a pattern on a single size of hook, and only make the patterns enumerated below.

Patterns kept in stock on Sproat Hooks Nos. 4, 6, 8 and 10. Per dozen, \$ .50.

## Patterns Kept in Stock.

1	Brown Palmer, red	body	73	Stone.	104	Captain.

## Abbey & Imbrie's Erect Wing Trout Flies on Sneck Kendall Hooks.

Either with Pennell turned down eye or tied on single gut.

Hooks Nos. 6, 8, 10, 12 and 14, 10 cents each or \$1.00 per dozen.

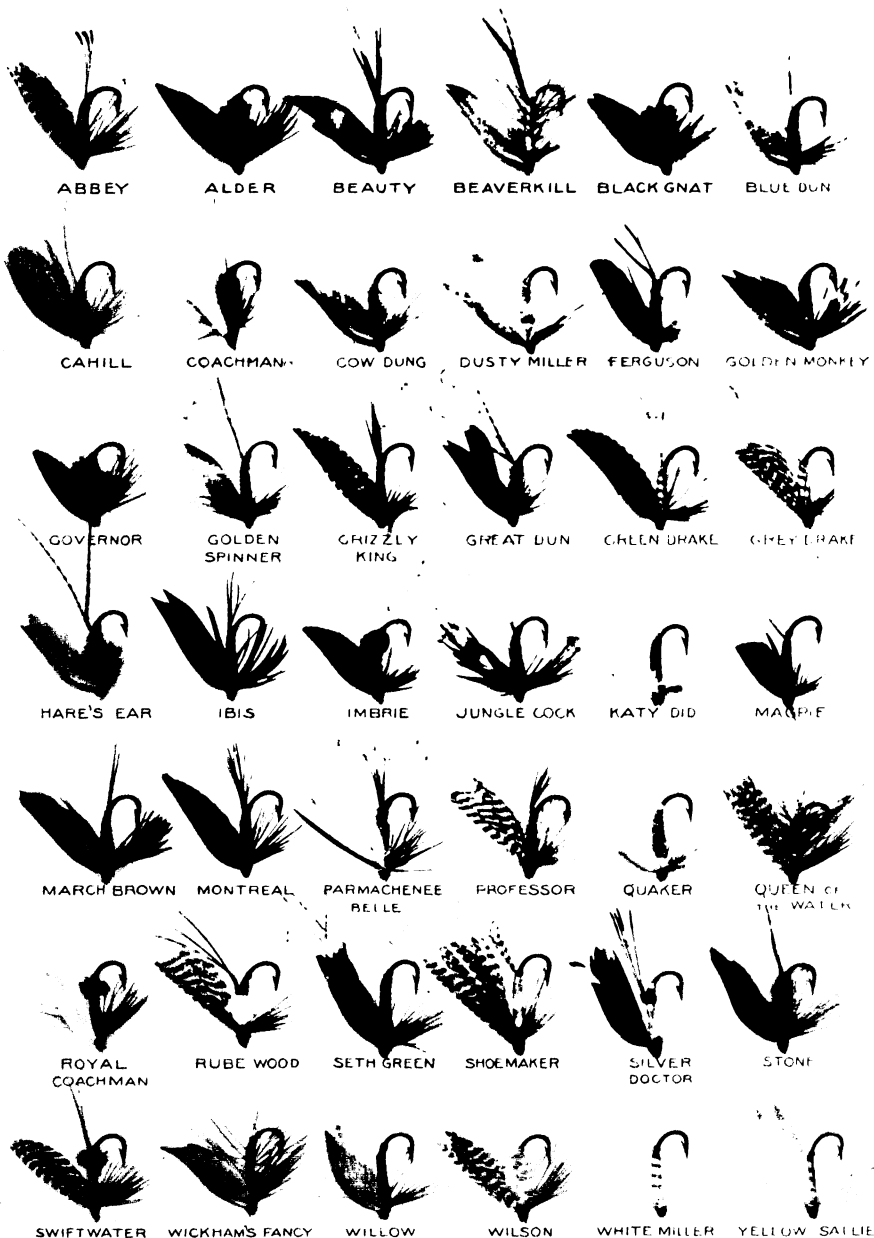

Especially recommended for "dry-fly" fishing.

### List of Patterns kept in stock.

Alder	Blue Quill	Hares Ear
Red Ant	Black Gnat	Grey Quill
Olive Quill	Red Quill	Black Quill
Ginger Quill	Coachman	White Moth

("Quills" are tied with very thin bodies, as in the illustration.)

We will tie to order one dozen or more of any of the standard flies, not named above. The prices of special flies are determined by the cost of material and the labor required to make them. Special orders must take their turn and will only be accepted with this understanding.

Extra Fine Quality Matched Wing Flies

# Abbey & Imbrie's Extra Fine Quality Flies.

(See illustrations on page 36.)

**Extra Fine "Reversed Wing" Flies on Sproat Hooks Nos. 6, 8, 10,  
10 Cents each or \$1.00 per dozen.**

**List of Patterns kept in stock.**

## "Cuttyhunk" Linen Lines.

**Abbey & Imbrie's Highest Quality  
"Cuttyhunk" Linen Line on Black  
Enameled Spools.**

**The best hard laid linen made:**

This line is manufactured of best Irish linen, and is guaranteed hand laid, by skilled workmen.

To get the best results from this line, immerse in water from end to end until it is thoroughly wet. Dry it stretched taut. This "sets" the line, and not only lessens the liability of "kinking" but helps to even its strength.

Nos.	Tested to lbs. pull	150 feet Per spool	300 feet Per spool	600 feet Per spool

# Tapered Enameled Silk Fly Lines.

## "The Two Herons" Tapered Line.

The perfect tapered fly line. Made of the best braided silk enameled with a high lustre finish. It is soft and pliable—not wiry and hard as some enameled lines.

A tapered line has the advantage of weight in casting, yet because it tapers at the end, the flies are dropped lightly and naturally on the water.

Each line in a box.

# Sinkers.

**"Coin" Sinkers.**

**"Packed like money from the bank."**

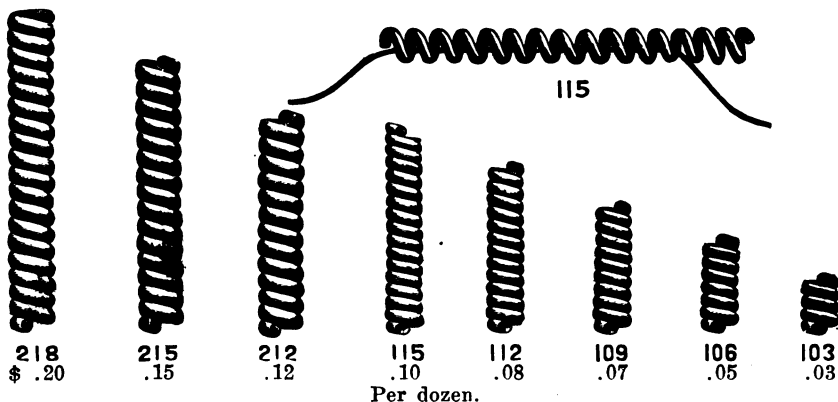

Illustrations are exact size. Coin Sinkers are cut from light sheet lead. When pinched on the line as shown above, the sinker becomes a rudder or keel and prevents the line kinking while trolling. Can be instantly attached anywhere on the line without knotting or fraying it.

Nos.....	5	7	9
Diameter, inches.....	$\frac{5}{8}$	$\frac{7}{8}$	$1\frac{1}{8}$
Per dozen.....	.06	.12	.18

## Coil Sinkers.

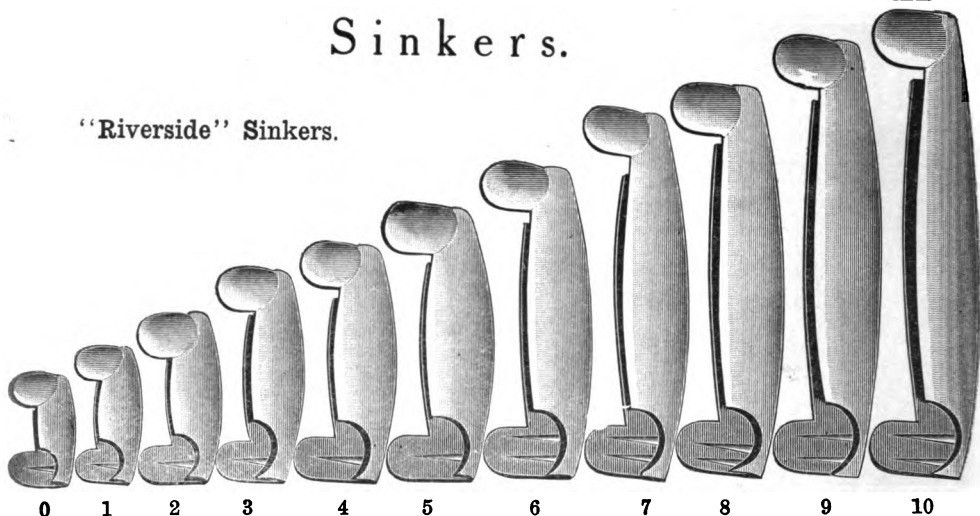

The new "split shot." Can be cut into any weight. Will not fray the line or leader.

# Sinkers.

## "Riverside" Sinkers.

By a half turn of the thumb and finger this sinker may be fastened securely to the line at any place. Give it a pinch—that's all!

## Abbey & Imbrie's Celebrated Noib-Wood Rods.

We believe that our Noib-Wood is the best material for "solid wood" rods. The fibre is close, wavy, tough and elastic. The action is peculiarly its own—full of life—and feels strong. The entire rod is made by hand, including the German silver mountings. The wood is left in its own beautiful color and the rods are coated with our best varnish, rubbed and polished. We do not sell Noib-Wood at any price, except as made up into our own rods.

### Noib-wood Fly Rods.

Cork handle. Hand-made German silver mountings. Snake guides. Extra tip. Put up in a covered wood form and in canvas bag.

	Each

et long. ....	12	13	14	15	16

## Abbey & Imbrie's Celebrated Noib-Wood Rods.

**For Salt Water Fishing.**

We have made Noib-Wood Tarpon Rods for twenty years under a guarantee to replace every tip broken on a fish.

**Unquestionably the best Tarpon Rods made.**

Made in one piece tips, 18 inch Hard Rubber Detachable Butt with Patent Adjustable Locking Reel Band. Double Bell Guides and Agate Tip. In canvas bag. 6¾ feet long.

The "Tarpon" Rubber Butt and 13 oz. Tip.....	\$17.50
The "Currituck" " " 11 " .....	17.50
The "Heavy Weakfish" " 9 " .....	17.50
The "Light Weakfish" " 7 " .....	17.50

All of the tips listed above will fit the same butt. Tips of various weights may therefore be used with the same butt.

One Rubber Butt and two Tips of any weight..... \$25.00

Extra Tips, \$8.50 each.

Extra Butts, \$9.00.

The "Tuna Rod"—Rubber Butt and 15 oz. Tip..\$17.50 With two Tips..\$25.00

The "Tuna" Rods have larger ferrule than "Tarpon."

Lighter weight tips to fit "Tuna" Butts will be made to order at the same price.

## The "Victoria" Greenheart Fly Rod.

Made in England for Abbey & Imbrie.

For the angler who wants "something different." Made of selected greenheart, well wrapped with black silk windings, fitted with gun metal mountings, light "snake guides" and hand-sewn pig-skin grip.

Each ferrule fitted with metal hitch, after the English fashion, to permit joints, when set up, to be securely lashed together. Rod is made in three pieces with extra tip, in canvas partition bag.

**No. 321.** Length 9 ft. Weight 5 oz. Each \$6.50.

## Abbey & Imbrie's Best Quality Hand-Made Lancewood Rods.

Best Jamaica Lancewood, shaped by hand from selected timber. Best hand-made German silver mountings. Entire rod finished in mottled rosewood style and covered with a special elastic varnish, rubbed and polished.

### Lancewood Fly Rods.

Cork grip. German silver hand-made reel seat and snake guides. In wood form and canvas bag. Three pieces and extra tip.

The "Beaverkill," 6 oz., 8½ feet..... Each, \$12.50

The "Megantic," 7 oz., 9½ feet..... " 12.50

### Lancewood Bait Casting Rods.

4½ inch cork grasp. German silver reel seat. One agate guide and two agate tips. The best lancewood casting rods made.

**Three piece with extra tip.**

The "Minnesota," 5½, 6 or 6½ feet long..... Each, \$15.50

### Lancewood Bait Rods with Rubber Butts.

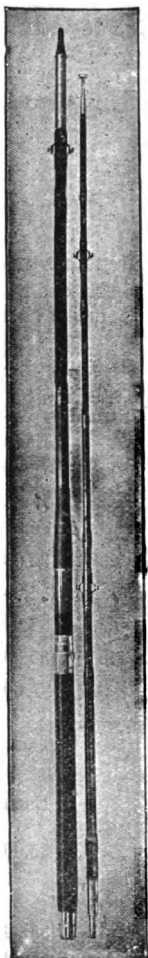

The "St. Lawrence" (Trolling), 9 oz., 7½ ft., each \$13.50 With Agates, \$15.50

The "Thousand Island" " 13 " 8½ " " 13.50 " " 15.50

# Abbey & Imbrie's Best Quality Calcutta Bamboo Rods

## For Salt Water Fishing.

These rods are built of carefully selected Calcutta Bamboo and are entirely hand-made. They are mounted with German Silver Bell Guides and Stirrup Tops. The butts are cord wound above and below reel seat.

No. O 25.

E35 Two-piece, with short detachable cord wound butt, and extra tip. Made in five weights as No. E34. Length, 7 feet .....	15.00

No. E 34.

## Abbey & Imbrie's Best Eight-Strip Split Bamboo Rods.

Made of the best of a thousand canes—**split**, not sawed.

More supple than six-strip rods because they more nearly approach the perfect cylinder.

Any rod can be **planed round**; but the natural surface enamel—the real strength of the cane—will be destroyed in the planing.

Built for the angler who wants **perfect action** as much as long life and power.

Product of a half-century of intelligent rod making.

Unreservedly recommended.

Absolutely guaranteed.

\* \* \*

All rods have our best hand made German silver mountings and patent adjustable locking reel bands. Put up in covered wood forms and best quality leather-bound canvas bags.

### Best Eight-Strip Fly Rods.

With solid cork grips, hand made hard rubber reel seats and snake guides.

			Each
The "Baby Brook"	3 ounces, 7½ feet long	.....	\$35.00

## Abbey & Imbrie's Best Quality Six-Strip Split Bamboo Rods

We guarantee these rods to be the best split bamboo rods made, excepting only our **Eight Strip Rods** on page 78. All have best quality **hand made** German silver mountings, **serrated ferrules**, patent adjustable locking reel bands and have duplicate tips. Put up in covered wood forms and canvas bags.

The material is the best grade of Calcutta bamboo, carefully split and glued by expert workmen.

### Best Six-Strip Fly Rods.

# Empire City Split Bamboo Rods

**"SPECIAL GRADE"—\$15.00.**

Split and glued by hand.

Fitted with hand-made German silver mountings.

Cork grips are made of solid "ringed" cork—not thin sheets wrapped over wood.

"Serrated" ferrules (cut crown-shape at the base) strengthen the rod at its weakest points. Most rods, if they break at all, break at the ferrules. **Our "Special Grade" Rods don't break at the ferrules.**

Each rod has an extra tip; and is fitted in a velvet covered wood form with canvas cover.

**The quality is certain to please the angler who wants a thoroughly good rod at a moderate price.**

## "Special Grade" Fly Rods.

### With Snake Guides.

Nos.	Ounces	Feet long
3300	3½	7½
3302	4½	8½

2411	Short Butt and two-piece. Extra tip. 6½ oz. 6½ ft.	

**We will mount any "Special Grade" or "Hand Made" Rod with one agate guide on butt and two agate tips for \$2.00 extra.**

## The New "Duplex" Rods.

The most popular rods ever sold at the price.

Two Rods in one—and only a two-inch plug to do the trick!

Made of split bamboo in three pieces, with extra tip and short detachable grip.

By inserting the Reducing Plug in the short grip, the middle joint and tip may be used alone, thus giving a shorter rod of lighter calibre but still of perfect action.

### Fly Rods.

No. 3 F. Combines 5 oz. brook rod (7 ft.), with 6½ oz. rod (9 ft.) for open fishing. Fitted with hollow hard rubber grip. Nickel mountings. German silver "Snake" guides. Extra tip. In flannel covered wood form. Each \$6.00.

No. 5 F. Combines 5 oz. brook rod (7 ft.) with 7 oz. rod (9 ft.) for open fishing. Made of carefully selected bamboo. Fitted with reversible cork grip. Full German silver mountings and "Snake" guides. Extra tip. In velvet covered wood form. Each \$10.00.

### Bait Rod.

No. 3 B. Combines a 6 ft. bait casting rod with an 8 ft. rod for still fishing. Fitted with hollow hard rubber grip. Nickel mountings. Two ring standing guides. Extra tip. In flannel covered wood form. Each \$6.00.

### Combination Rod.

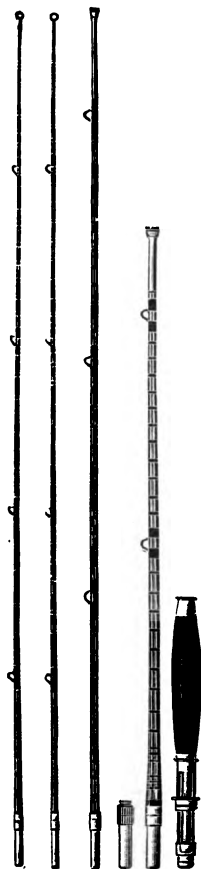

No. 5 C. Combines four rods in one—yet only has four pieces besides butt. Made of carefully selected bamboo. Fitted with reversible cork grip. Full German silver mountings. In velvet covered wood form.

## Adamant Rod Mountings.

The Adamant is carefully manufactured, is never rough, and by every test that can be applied, has proven to be the hardest, strongest and smoothest substitute for Agate ever made. Almost frictionless, the line never sticks—wet or dry, it is always free running. The guide is held rigidly in position by a band that runs in a groove around it.

## The "Governor" Drag.

**May be Fitted to Any Reel.**

The "Governor" is a friction device placed inside of a balanced handle which may be fitted to any reel. The mechanism is unobtrusive, yet thoroughly effective. It may be adjusted to give friction just within the breaking strain of the weakest point in the tackle. The reel with a "Governor" attached is entirely under the control of the angler's right hand, while the left hand is free to grasp the rod above the reel while

playing a fish, or to guide the line upon the spool while reeling in. No leather pad or other drag is needed. The angler merely holds the handle, and the friction discs do the rest. A rush which would ordinarily break the line is taken up by the retarded slipping of the discs under well regulated friction. When the fight relaxes, the angler turns the handle and the line is recovered at the full speed of the reel.

**Made in Two Sizes.**

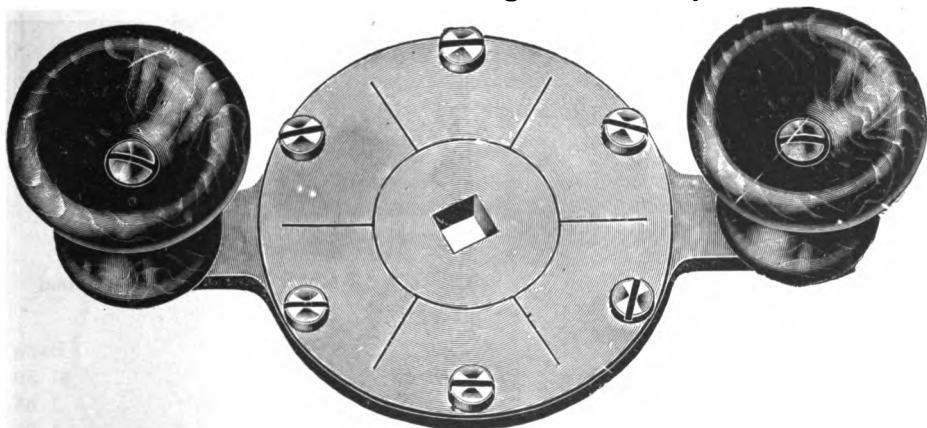

**Nickel Plated German Silver**

No. 2 Length 3 9/16" (For salt water or large fresh water reels) ..	\$2.00	\$2.50 each
No. 3 Length 2 7/16" (For small multiplying reels) .....	1.50	2.00 "

The following sizes of square stem holes are kept in stock: .250, .235, .230, .202, .195, .187 inch diameter. The No. 3 "Governor" is also made with a round hole for our "Take-Apart" Reel.

**Directions for Setting Drag.**—After taking off old balance handle put the "Governor" handle in its place; then fasten the line to any stationary object, hold fast to the "Governor" to keep it from turning and lift the rod as when resisting a fish. Adjust the six small clamping screws until the desired tension is obtained. A small screw driver is furnished with each drag. When once adjusted it need not be readjusted unless heavier or lighter tackle is used. If the size of your stem hole should be between any two of the above diameters, take the next smaller one and file the "Governor." This can be done in a few moments.

## The "Rabbeth" Handle Drag—For Heavy Fishing.

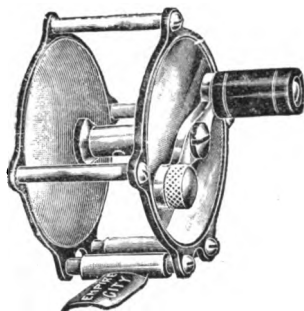

The principle of the "Rabbeth" drag is the same as that which underlies the "Governor." We carry four sizes in stock; with a square hole 7/32, 8/32, 10/32 and with screw thread 7/32. We guarantee satisfaction. No tarpon outfit is complete without it. If reels are sent to us we will fit "Governor" or "Rabbeth" Drags to them without charge. Price, \$5.00 each.

## Single Action Reels.

The standard by which we measure the capacity of our reels is a No. 9 Cuttyhunk twisted linen, or a No. 6 braided silk. Proper allowance should be made when larger lines are used.

4307	80		4.00

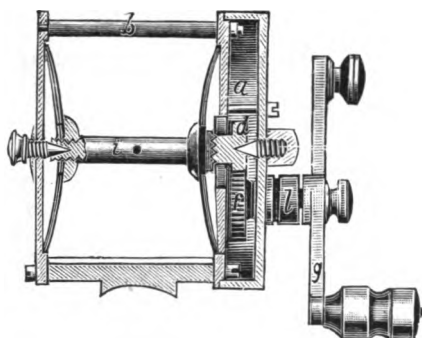

No. 4306.

# Abbey & Imbrie's

## Patent "Compensating" Reels.

The Standard by which we measure the capacity of our reels is a No. 9 Cuttyhunk twisted linen, or a No. 6 braided silk. Proper allowance should be made when larger lines are used.

(Sectional view showing cone-bearing.)

Our "Cone-bearing" or "Compensating" Reels are the most durable reels made. When the axle of an ordinary reel wears, the spool wobbles and the reel rattles. In a "Compensating" reel this wear is taken up by tightening the cone-screw with the fingers. After years of hard work new cones may be had at small cost. We guarantee every reel to give satisfaction.

The "Compensating," steel pivot, cone-bearing reel is not a "new idea."

We invented the mechanism in 1882. Since then we have improved and perfected it.

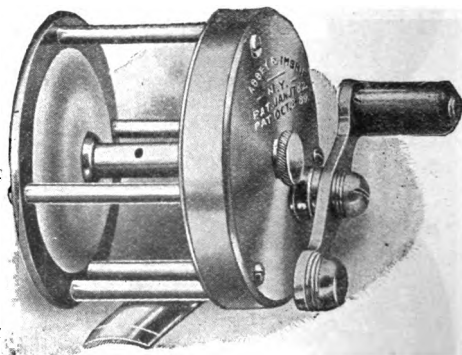

Of the 272 different kinds and sizes of reels in our stock, the "Compensators" have always given, and still give, the most satisfaction. Time has proved their worth. They have long ceased to be an experiment.

### Double Multiplying Compensating Reels.

Nickel Plated, with Click.

Nos.	Yds.	Capacity.	Each
94C	40		\$2.50
96C	60		2.75
97C	80		3.00

99C	150		4.00
99¼C	200		4.50
99½C	250		5.50

(Reel No. 96C will hold 50 yards of A. & I. "Japanite" Braided Silk No. 6.)

No. 94C.

Nickel Plated, with Slide Drag.

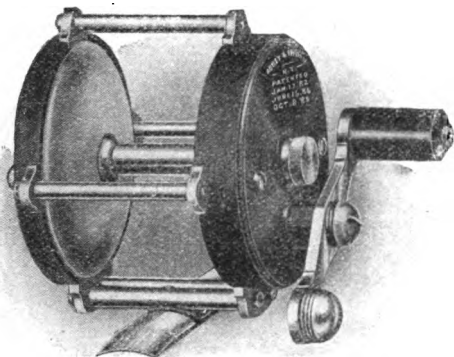

For salt water fishing.

Nos.	Yards Capacity	Each	98 CS	99 CS	99¼ CS	99¾ CS	(Tarpon) 99 4/4 CS
98 CS	100	\$5.00		150	200	300	350
99 CS			5.50		6.00	8.00	11.00

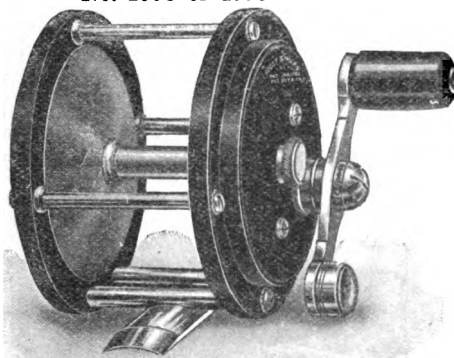

(Reel No. 99¼ CS will hold 300 feet of A. & I. Cuttyhunk Line No. 15.)

# Abbey & Imbrie's "Compensating" Reels.

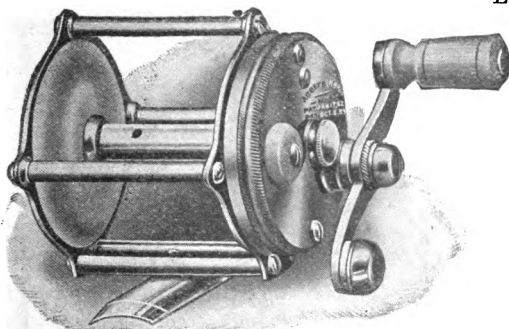

## Hard Rubber Compensating Reels.

No. 206C or 406C

The "Imbrie Reel."  
"Our Best Black Bass Reel."

No. 0216C. (Spool 1½ inches wide.)

### Double Multiplying.

Nos.	Yds. Capacity	Each
204C	40	\$3.25
206C	60	3.50
207C	80	4.00
208C	100	4.50
209C	150	5.00
209½C	200	5.50

### Quadruple Multiplying.

Nos.	Yds. Capacity	Each
406C	60	\$5.50
407C	80	6.00
408C	100	6.50

This pattern of "Compensating" Reel has lightness, strength and fine proportions. It is sure to satisfy the man who wants "a thoroughly good reel at a moderate price."

(Reel No. 209C will hold 100 yards of A. & I. Extra Strength "Organzine Sericum Braid Silk" No. 88.)

### The "Imbrie" Reel.

Hard Rubber and German Silver with Click.—Double Multiplying.

Nos.	Yds. Capacity	Each
486C	60	\$9.00
488C	100	10.00
489C	150	11.00
489¼C	200	13.00
489½C	250	15.00

A fine leather case is supplied with each "Imbrie Reel."

(Reel No. 486C will hold 50 yards of A. & I. "Lustre Finish" Enamelled Silk Line No. 6.)

### Quadruple Multiplying Compensating Reels.

Special Wide Spool Bait Casting.

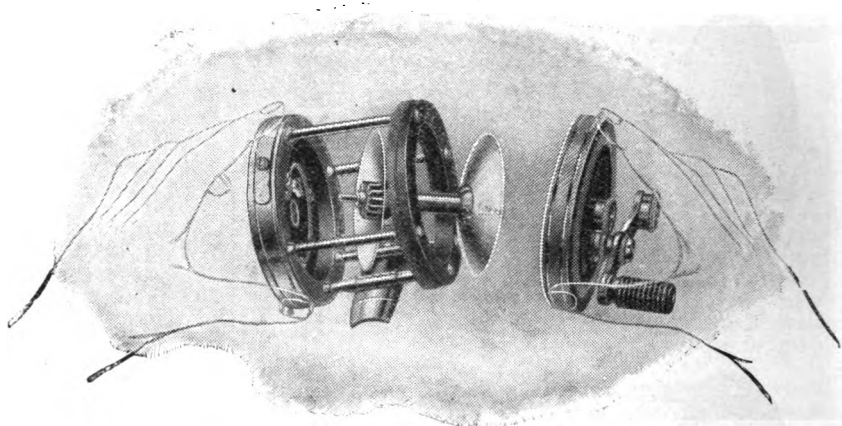

Nickel Plated, with Click and Drag.

Nos.	Yds. Capacity	Each
0216C	60	\$5.50
0217C	80	6.00

May be had in style of reel 94C (on Page 122) with round discs and narrow spool at same prices.

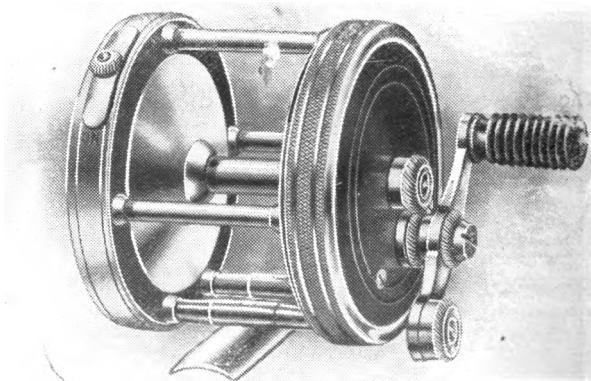

## Rubber "Take-Apart" Reels.

"All You Need is Your Hands.

### Hard Rubber and German Silver.

It may be **taken apart** in a few seconds for oiling and cleaning, without the use of any tool. The click is controlled by a sliding band on the rim, and may be adjusted instantly by a pressure of the thumb even while the reel is in use. It sounds only when the fish runs and is silent when the line is being reeled in. The bearings may be instantly adjusted by a screw cap which acts as a drag and produces any degree of friction desired. Bait casters will find this an immense advantage because it prevents "back lashing" absolutely.

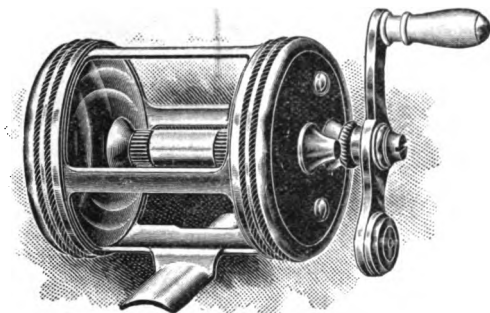

Nos.		Yards Capacity	Diameter of Spool	Length of Spool	Each
2507	Double Multiplying .....	80	1 $\frac{1}{4}$ "	1 $\frac{1}{16}$ "	\$3.00
4507	Quadruple Multiplying ...	100	1 $\frac{1}{4}$ "	1 $\frac{1}{8}$ "	3.50

## Metal "Take-Apart" Reel.

### Quadruple Multiplying.

With Tubular Frame and Flat Bars.

No. 4517TR.

The pinion gear is cut from steel and the pivots are turned upon a solid steel shaft running the entire length of the spool.

The headplate is adjustable, which allows the handle to be placed in different positions. The same applies to the end plate with the click mechanism.

The size of a 60-yard reel with the capacity of an ordinary 80-yard reel.

4517T All Metal .....each \$5.00      4517TR Rubber Face.... each \$6.00

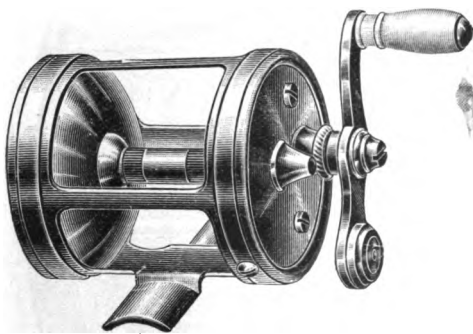

Its smooth and noiseless action is not surpassed by any reel.

The frame of the reel is rigid and strong with no screws to jar loose, and become lost.

It has a device by which any degree of friction can be secured on the spool, thus preventing all back lashing. The beginner can depend wholly on this feature while learning the art of bait casting.

The metal bands on either end may be unscrewed from the frame in a few seconds and the spool can be lifted out for clearing a tangle in the line, or for oiling the mechanism, without the use of any tools whatever.

## The "Tri-Part" Reel.

Each \$3.50.

### Quadruple Multiplying.

The "Tri-part" reel frame and reel seat are drawn from one piece of plate brass, without solder, joint or rivet, finely finished and beautifully nickeled, with spool of German silver.

If properly taken care of and the bearings oiled after using, it will last a life-time and satisfy the most critical angler.

Bearings are steel and bronze, ground to perfect fit, highly polished, smooth running, noiseless.

Made in one size. Capacity 80 yards; but, on account of tubular frame construction is no larger than a 60-yard reel.

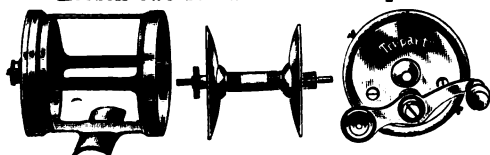

Click is made of hardened steel tempered in oil.

Adjusting cap has friction device. Prevents back lashing.

It will not rattle even after years of use.

### Three Parts—That's All!

Loosen two screws to take it apart.

Width of spool,  $1\frac{3}{8}$  inches.  
Diameter of spool,  $1\frac{3}{4}$  inches.

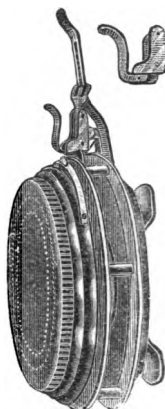

# Automatic Reels.

## Martin Automatic Reels.

Nos.	Yds.	Size	Weight	Each
1	25	Trout	8 oz.	\$5.00
2	25	Trout	8½ oz.	6.00
3	50	Bass	8¼ oz.	7.00
4	75	Salmon	8½ oz.	8.00

(Nos. 2, 3 and 4 have lock brake to hold back the tension lever while playing the fish.)

“Martin” No. 2

## “Y. & E.” Automatic Reels.

### No. 1—\$5.00 each.

Carries and re-winds automatically 90 feet of No. 5 Silk Line. Weight, 8 ounces. Diameter,  $3\frac{1}{32}$  in.

### No. 2—\$6.00 each.

Carries and re-winds automatically 150 feet of No. 5 Silk Line. Weight, 12 ounces. Diameter,  $3\frac{1}{16}$  in.

## “Y. & E.” Automatic Combination Reels.

May be made either automatic or free-running by the pressing of a catch.

### Style A—\$7.00 each.

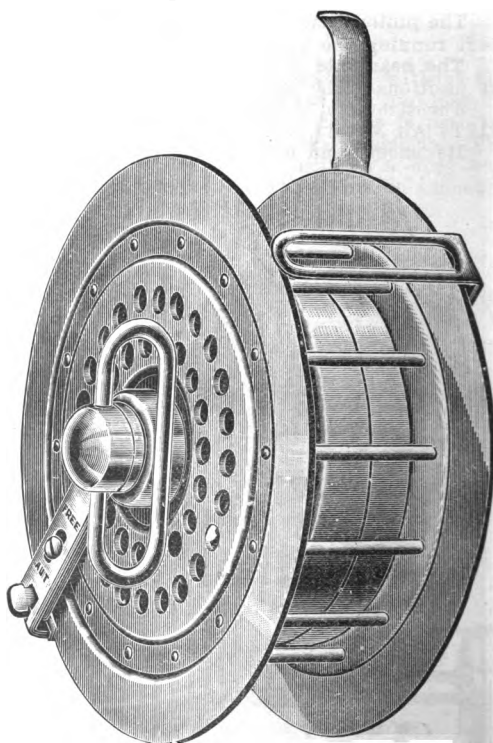

Diameter,  $2\frac{7}{16}$  in.; weight,  $7\frac{1}{2}$  oz.; capacity, 125 feet No. 5 silk. Winds 50 ft. automatically without rewinding by key.

### Style B—\$8.00 each.

Diameter,  $3\frac{3}{8}$  in.; weight, 11 oz.; capacity, 300 feet No. 5 silk. Winds 90 ft. automatically without rewinding by key.

### Style C—\$9.00 each.

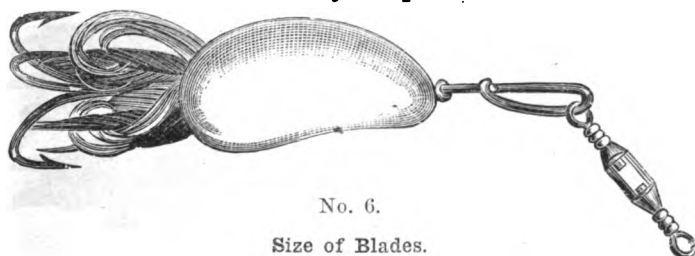

Diameter,  $4\frac{1}{4}$  in.; weight, 16 oz.; capacity, 60 ft. No. 5 silk. Winds 150 ft. automatically without rewinding by key.

## Abbey & Imbrie's Best Spoon Baits.

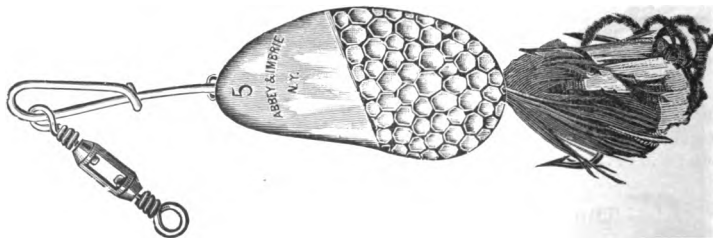

The lightest and easiest running spoon baits made. To be successful in trolling requires a spoon that will twirl with the least possible motion, combined with a lightness that will allow it to be used as far away from the angler as desired. The shape and finish are the results of careful experiments, while quality and workmanship are the best.

### Abbey & Imbrie's "Spin Easies."

"The High Hook Winners of the World."

## The Spinning Coachman

With the Interchangeable

and

No. 32.

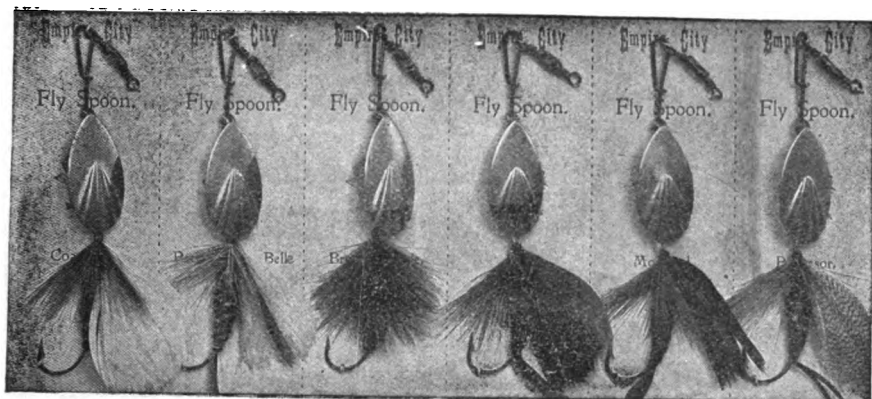

For the Game Fish of America this Bait will be found killing all seasons.

With gut trace, nickel-plated blade, 1¼ inches long; three interchangeable flies on No. 2 Hook.

- Nos.
- 30 Coachman, Governor and Golden Spinner.
  - 31 Coachman, Parmachenee Belle, Silver Doctor.
  - 32 Coachman, Parmachenee Belle, Raven.
  - 33 Coachman, Ibis, Onondaga.
  - 34 Coachman, Professor, John Mann.
- Per card \$ .30

## Fly Spoons.

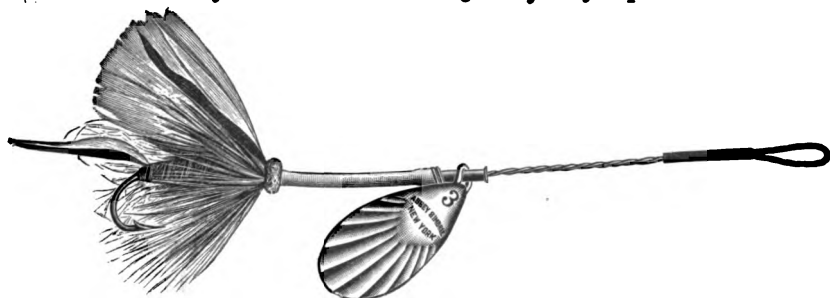

### "Empire City" Fly Spoon.

An excellent device for Black Bass trolling. It is a combination of the Empire City Fluted Spoon No. 3 and a bass fly tied on No. 1/0 sproat hook. They are packed  $\frac{1}{2}$  dozen in a box, each box containing the following assortment of six standard bass fly patterns: Professor, Coachman, Parmachenee Belle, Ibis, Brown Hackle and Dark Montreal.

Each, \$.20. Box of 6, assorted, \$1.00.

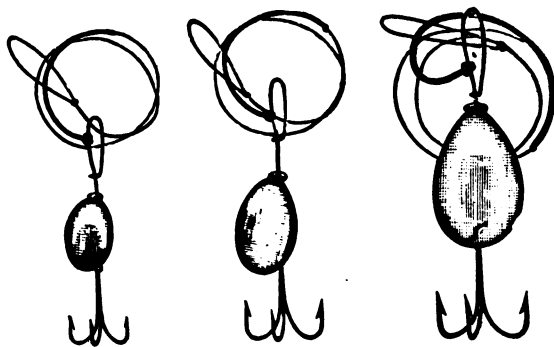

### Abbey & Imbrie's Best Quality Fly Spoon.

The materials used in this fly spoon are the best it is possible to obtain. The fly is our **Extra Fine Quality Reversed Wing** tied on a hand-made tested bronzed sproat hook. The gut is treble machine twisted and stained mist color, with loop lashed with silk and varnished. The blade is our best quality fluted, silver finished and revolves on a fine metal tube which prevents the gut from becoming chafed. The distance at which the spoon revolves above the fly is maintained, and may be regulated, by a fine rubber tube that also protects the gut. Made only with Silver Doctor, Parmachenee Belle and Dark Montreal flies. (Other patterns made to order.)

Card of 3 all of one size .....			.25
Card of 3, one of each size .....			.25

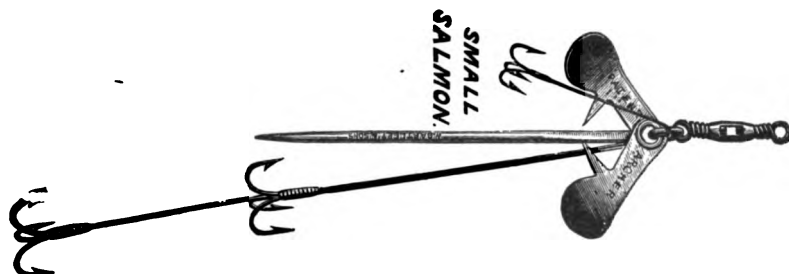

\$ .20 each, or 6 for \$1.00.

Brass or Nickerled. Light enough to be cast with a fly rod. Effective when flies have failed. Length of blade  $\frac{3}{4}$  inch. Each, \$ .20. Per dozen, \$2.00.

# Spinners.

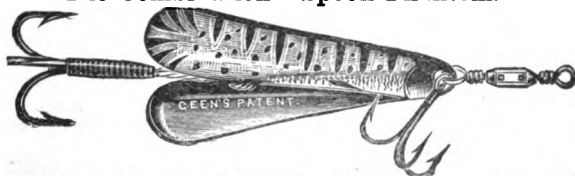

## “Archer” Spinners.

Run the needle through the Minnow and press the fin points into the gills.

Sizes	Small	Small			
	Sea	Pike	Pike	Salmon	Trout
	Pike	Salmon	Salmon	Salmon	Trout
Price,	\$ .50 each; \$5.00 per dozen.				

## The Combination “Spoon Phantom.”

The “Combination Spoon and Phantom” is half concave and half convex, and as the convex portions are colored like a “Phantom,” while the concave portions glitter with gold or silver, we have at each revolution of the bait, the irresistible flash of a “Spoon” and the definite attractiveness of a “Phantom.”

Nos.	1	2	3	4	5	6
Inches long	1¼	1½	2	2¾	3¾	4¼
Each	\$ .50	.55	.60	.65	.70	.75

## Abbey & Imbrie’s “Torpedo.”

A revolution bait made of “Silverine”—an alloy which will retain its brightness better than nickel plate or German silver or aluminum. The body is absolutely water-tight and the bait will float on the surface with the slightest motion.

No. 1.	Length of body,	2¾	inches,	with	bucktail	or	feathered	hook..	\$ .40	each.
“ 2.	“ “ “ “	2¼	“ “ “ “	“ “ “ “	“ “ “ “	“ “ “ “	“ “ “ “	“ ..	.40	“

## Dowagiac Wood Minnows.

"DOWAGIAC" minnows are made of selected cedar, chemically treated to prevent the absorption of water. They are weighted so that they run absolutely true.

The spinner blades revolve in opposite directions rendering the use of swivels unnecessary. All metal fittings including treble hooks, are heavily nickel-plated, thus preventing rust while adding to the attractiveness of the lure.

The treble hooks are always presented outwardly toward the fish. The ingenious method of attaching them permits the substitution of any desired ringed hook, and keeps them at all times from marring the body of the bait.

Every "Dowagiac" minnow has from seven to twelve coats of special porcelain enamel, according to the style of the finish. This enamel is guaranteed not to peel off or crack.

### Style No. 100—75c. Each.

With 3 Treble Hooks and 2 Spinners.

Length of body,  $2\frac{3}{4}$  inches.

Weight, about  $\frac{3}{4}$  ounce.

Nos.	Colors
100	Fancy Back
101	Rainbow
102	White
103	Aluminum
104	Red
105	Yellow
106	Gold
107	Fancy Sienna Yellow

### Style No. 150—\$1.00 Each.

With 5 Treble Hooks and 2 Spinners.

Length of body,  $3\frac{1}{2}$  inches.

Weight, about 1 ounce.

Nos.	Colors
150	Fancy Back
151	Rainbow
152	White
153	Aluminum
154	Red
155	Yellow
156	Gold
157	Fancy Sienna Yellow

### The Dowagiac "Artistic" Minnow—75c. Each.

With 1 Treble Hook and 1 Spinner.

Length of body,  $1\frac{1}{4}$  inches.

Weight } Without buoy,  $\frac{1}{2}$  ounce.  
 } With buoy,  $\frac{3}{4}$  ounce.

The first really successful artificial minnow placed on the market which carries but one treble hook.

Not less than one year of careful experiment by discriminating bait-casters preceded the introduction of this bait. It is offered with confidence in its adaptability to the requirements of the artistic bait-caster. Its size, weight, sinking tendency, coloration, hook presentment, etc., have been thoroughly considered after practical tests.

This bait carries with it a novelty which we term a "weight-buoy." It is enameled dark lead color and can be attached on the line 3 inches above the minnow, thereby giving additional weight when desired for casting, and to prevent the minnow from sinking too rapidly in shallow water. Full instructions for use of buoy accompany each bait.

The metal fittings (except the hook) are gold plated and polished.

The special long shank hollow point treble hook at the rear is tied with a beautiful combination of colored buck tail and feathers, the former genuine deer tail.

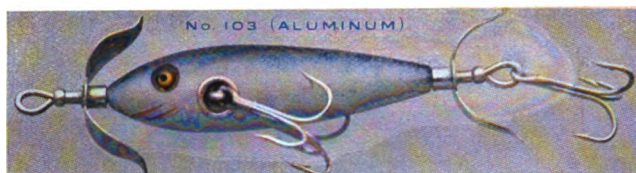

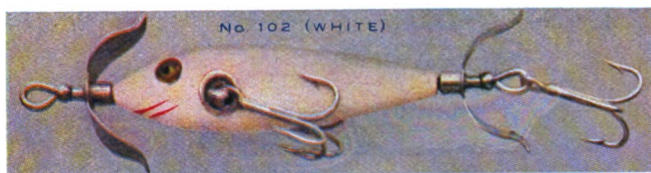

Nos.	Colors.
50	Yellow body, fancy mottled back.
51	Gold body, and greenish cast back.

### The Dowagiac "Expert" Surface Bait—75c. Each.

For casting or "skittering." A great killer where bass are in shallow water, not over six feet deep. No. 200.

## Heddon's "DOWAGIAC" Minnows

## Artificial Baits,

**Abbey & Imbrie's Small  
Baits, Assorted—All  
Soft Rubber.**

Two new assortments of popular and successful artificial baits selected with special regard for the known preferences of Trout and Bass.

All baits are made of best quality soft rubber.

Per card

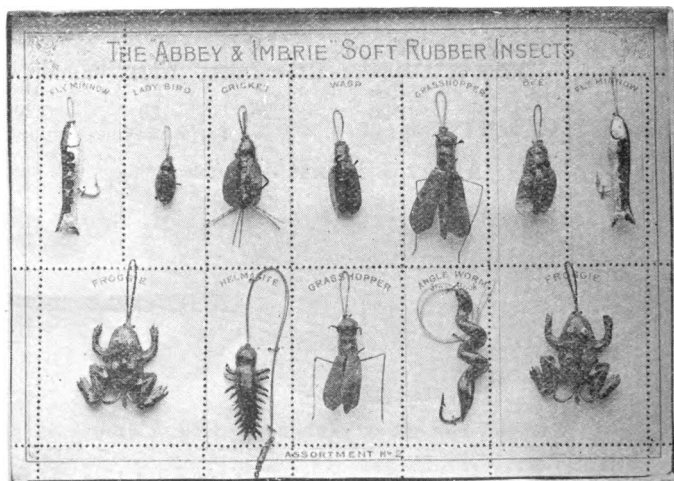

No. 1. Bass Assortment.

½ dozen on a card \$1.60

No. 2. Trout Assortment.

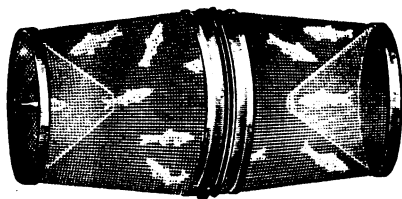

1 dozen on a card 2.40

We do not sell less than a full card.

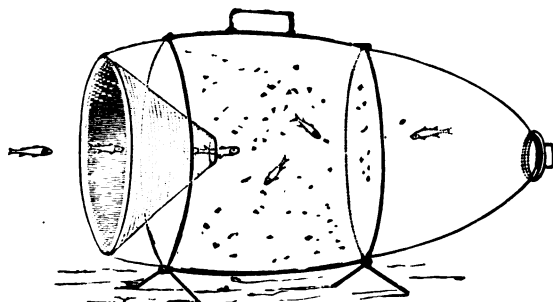

Trout Assortment No. 2. (Illustration half size.)

## Minnow Traps and Preserved Minnows.

### Wire Minnow Trap.

17½ inches long. 9 inches in diameter. Breaks at the centre. One end may be set inside the other for convenience in packing. Each, \$ .90.

### Glass Minnow Trap.

The best minnow trap made. 12 inches long, 8 inches in diameter. Made of heavy flint glass. Handle and legs of galvanized metal.

Each, \$3.00.

### Preserved Minnows.

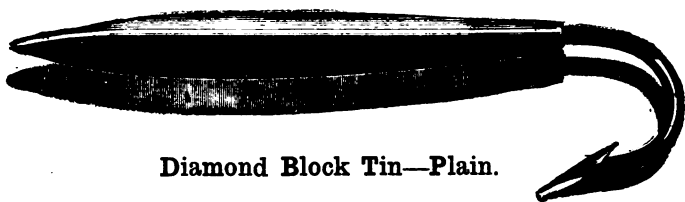

Our preserved minnows are indispensable when it is difficult to procure live bait. They are not hard or tough yet they are rigid enough to stay on the hook without splitting open. They have not lost the natural shape or shine of the live minnow. They are put up in bottles securely sealed.

1. With metal parts galvanized steel.....	\$1.75
2. With metal parts brass	2.50

## Minnow Pails and Dip Nets.

### The "Abbey" Galvanized Minnow Pails.

Heavily galvanized inside and outside. Will not rust. Sides of interior pail made of galvanized wire netting, permitting rapid flow of water. Recessed top to hold ice if desired. Plain, strong, practical, durable. One size only—10 quarts capacity.

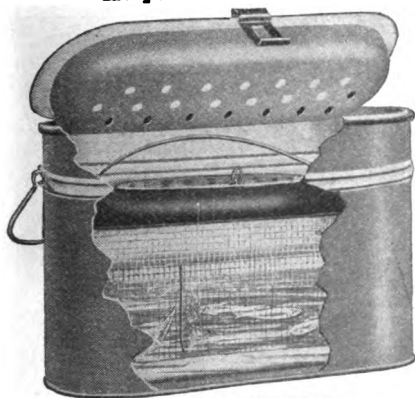

No. A. Floating pail, with air chamber in interior pail. Each, \$1.25

No. 5. Not Floating, without air chamber.

Each, \$1.00

### The "Jones" Aerating Minnow Pail.

"Keeps 'em Alive!"

Patented May 22, 1906.

This pail consists of an outer water receptacle, on the inside of which is a galvanized wire inset, provided at its top with an oval air chamber, fitted with a valve to receive an ordinary bicycle pump, by means of which compressed air is supplied to the chamber.

Leading downward from the air chamber to the bottom of the inset, is a fine outlet tube which ejects a current of air at the bottom of the inset. It will run from 4 to 6 hours, thus constantly supplying plenty of fresh air to the minnows.

The air chamber also serves as a float for the wire inset when it is desired to place the minnows in the stream or lake.

The pail is elongated. Experience shows that minnows will live longer in a pail of that shape than in a round pail. It is made of heaviest quality dairy tin and is nicely painted, striped and ornamented.

Capacity, quarts .....	8	12
Price, each .....	\$2.50	3.00

### Minnow Pail Dip Net, Complete.

No. 200. Nickel Plated Wire, with 5 in. cotton net, 10½ ins. over all ..... Each, \$ .25

For practicing bait casting.

Polished wood with lead nose. Each one balanced separately. Weight guaranteed to the grain.

Two sizes,  $\frac{1}{4}$  oz. and  $\frac{1}{2}$  oz., \$ .15 each.

# The Paine Boat—\$30.00.

(Patented December 26, 1905.)

For Fishing, Hunting and Camping.  
For Engineers and Prospectors.  
As a Tender for Launch or Sail-boat.  
For Automobile Touring.

\* \* \*

IF you were ever becalmed with no tender to take you ashore—

IF you ever emerged from the woods upon a mountain lake, brimming with trout, but with no canoe in which to try your luck—

IF you ever crouched, damp and disgruntled, on the edge of a marsh waiting for the ducks to come—

IF you ever stumbled through underbrush seeking a lost trail, with a 70 lb. canoe upon your back—

IF the motor in your launch simply wouldn't work—

**YOU ARE THE MAN** who needs a Paine Boat.

*Folded, ready to roll.*

It is made of canvas, guaranteed thoroughly waterproof. Its weight (22 lbs.) is one third that of an ordinary canoe. Its practical and simple construction enables anyone, after a few trials, to erect it in three or four minutes—one fifth the time required to set up other so-called "folding boats."

When folded it measures only 7x7x42 in., and so may be easily carried, or packed in a small space—stowed under a wagon seat, or in the cockpit of a sailboat—or "checked through" as ordinary baggage.

The Paine Boat, when in the water, is 10 feet long, holds two persons with plenty of room for guns, decoys, tackle or baggage.

*Ribs disjointed, ready to fold.*

Length—10 feet.

Capacity—2 persons.

Size Folded—7x7x42 inches.

Weight—22 lbs.

Time to erect—4 minutes.

Price—\$30.00.

\* \* \*

White spruce double paddle, 7 ft. long, copper tipped and varnished, with nickel joint..... \$3.00

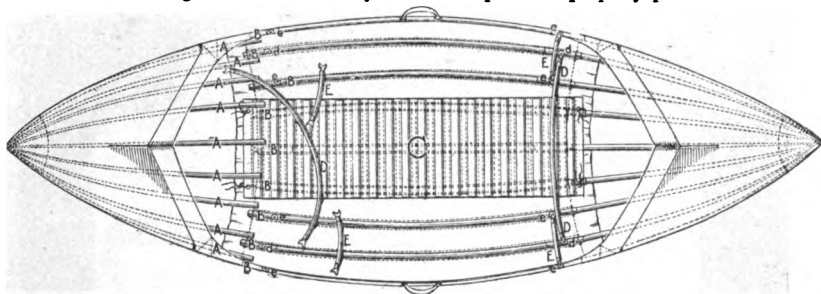

White spruce single paddles, 5 ft. long..... 1.50

*Four minutes after leaving the water.*

## How to Erect the Paine Boat.

The left end shows ribs unjointed and spreaders out of position.  
The right end shows ribs jointed and spreaders properly placed.

Unfold and extend the canvas.

Each longitudinal rib is in three sections. Place the butts (A, A, etc.) of the end sections in the sockets (B, B, etc.) at one end of the boat and then repeat the operation at the other end.

Spread the boat by placing the two transverse spreaders (D, D) in position, the ends of each fitting in the brass grommets (d, d, etc.) so as to bear fairly against the first rib below the top rail of the boat.

Next place the four short uprights (E, E, etc.) in position, fitting the ends in the remaining grommets (e, e, etc.), care being taken that each end bears fairly upon a rib.

Finally, place the running board (C) in the bottom of the boat, with strips running athwart.

The boat should be thoroughly dry before stowing.

### Some letters from those who have used the Paine Boat.

It has remained for one of the Eastern firms to get out the very best folding boat that has ever come to our attention—and we have been interested in that sort of thing for a good many years. This is called the Paine Boat. There are innumerable uses for just this sort of craft, as every out-door man has long ago found for himself. Not the least of these uses are those which will readily occur to the duck hunter.

(Extract from *Shooting and Fishing*, November, 1906.)

This summer I used my Paine collapsible boat, as a dingy on my sloop yacht "Gauntlet." When not in use, I stowed it away in a locker. I have for years looked for a reliable collapsible boat, to be used as a tender, because a dingy towing on astern, certainly retards a boat's speed to a great extent. Your boat is the only practical one I have seen, and will prove very popular.

G. W. ROBINSON,  
City Island, N. Y.

You might be interested to know how we got along with our Paine boat. I got it especially for a tender to my cat boat "Frances." I used it to convey my wife and two children to and from the shore, and when it was not in use, I took out the spreaders and let it lie flat on the cabin top. Too much cannot be said in its favor as a tender to a small yacht.

O. W. JONES,  
New Rochelle, N. Y.

I have just returned from the woods and have found the Paine Boat eminently satisfactory. Some places I know of have yielded some good fish this year which would have remained where they were if I had not had the boat. I can recommend it thoroughly to sportsmen who know the need of something to reach fish inaccessible from the shore.

G. M. L. LA BRANCHE,  
80 Broad St., New York.

There is no doubt that it is a practical boat. It is stable once the load is in and seaworthy and entirely to be relied upon as an emergency boat.

Dr. H. B. FAVILL,  
100 State St., Chicago, Ill.

It affords me great pleasure to state that I have derived a great deal of pleasure and benefit during the past season from the Paine Folding Boat which you sold me.

You are at liberty to use my name as reference.

MAURICE COSTER,  
c/o Westinghouse Elec. Co., New York.

The Paine Boat is a splendid little duck boat just right for one man, but fully large enough for two men not over 150 lbs. each. I was surprised to find it so steady. It would not rock or tip like other canvas boats that I have been in.

Dr. J. L. LINDSAY,  
Poplar Bluff, Mo.

## Color-Plates of Flies.

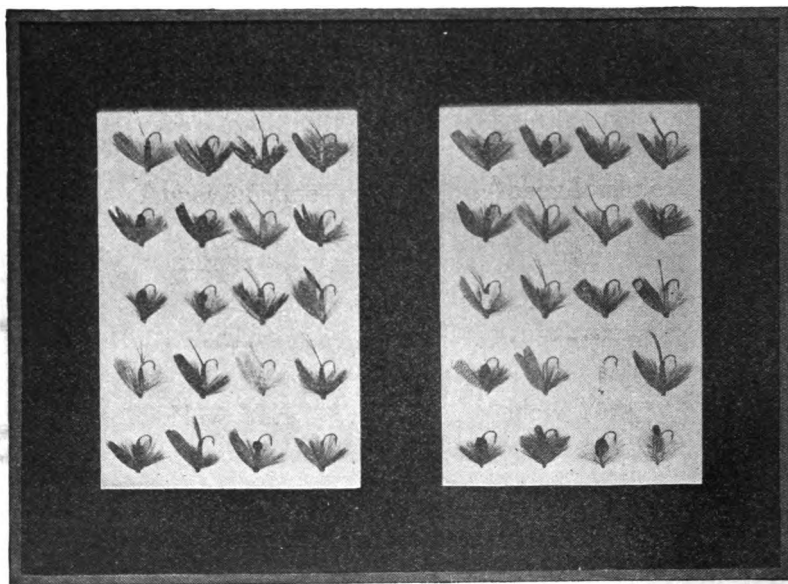

Plate A—"Reversed Wing" Flies.

Faithful reproductions of standard trout and salmon flies used in American waters. The finest product of the color-printer's art.
